

Priya Sharma

Data Analyst

+91-98XXX XXXXX | priya.sharma@email.com | LinkedIn | Mumbai, Maharashtra

Profile Summary

Data Analyst with 2+ years of experience in Python, SQL, Power BI, and Excel across e-commerce and retail domains. Skilled in data cleaning, ETL pipeline development, and building interactive dashboards to track KPIs and business performance. Able to translate complex datasets into clear, actionable insights that support data-driven decisions and stakeholder reporting.

Technical Skills

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn)

SQL & Databases: MySQL, SQL — Joins, Subqueries, CTEs, Window Functions, Aggregations, Query Optimisation

Data Visualization: Power BI (DAX, Power Query, Data Modeling), Tableau (Basic), Excel (Pivot Tables, VLOOKUP, XLOOKUP, INDEX/MATCH, Power Query, Macros)

Data Engineering & Quality: Data Cleaning, ETL Pipelines, Data Wrangling, Data Validation

Statistical Analysis: Scikit-learn, Regression, Clustering, Hypothesis Testing, EDA, Time Series Analysis, Forecasting

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Sheets, MS Office Suite

Business Intelligence: KPI Tracking, Dashboard Design, Complex Query Optimisation, Reporting & Storytelling

Experience

ABC Analytics Pvt. Ltd. Mumbai, India | Jun 2023 – Present

Data Analyst

- Designed and implemented end-to-end analytics dashboards, analysing over 50,000 transactions using SQL queries and ETL processes.
- Developed 15+ interactive Power BI dashboards for real-time KPI monitoring and performance tracking, enabling **30% faster reporting**.
- Built automated data pipelines using MySQL for structured data storage and real-time updates, improving operational efficiency by 25%.
- Implemented time series forecasting models using Python (Scikit-learn), achieving **85% accuracy** in predicting quarterly revenue.
- Performed comprehensive data cleaning and validation, ensuring **99% data accuracy** and reducing manual effort by 40%.

Projects

Store Sales & Inventory Analytics | SQL, MySQL

- Designed a relational database with primary/foreign key relationships to manage stores, staff, customers, products, orders, and inventory across multiple locations.
- Performed advanced SQL analysis using Joins, Subqueries, CTEs, and Window Functions (RANK, ROW_NUMBER, SUM, COUNT) to identify top-selling products and monthly sales trends.
- Developed SQL-based business reports for order processing, inventory tracking, and employee performance analysis to enable data-driven decisions.

Retail Sales Data Analysis & Customer Behaviour Insights | Python, Pandas, NumPy, Matplotlib, Seaborn

- Cleaned and preprocessed retail dataset by handling missing values, data type conversions, and date-based feature engineering.

- Performed customer behaviour analysis segmented by age, gender, and demographics; identified high-value customers and purchasing patterns.
- Conducted sales trend analysis and evaluated product category performance by revenue, creating visual reports using Matplotlib and Seaborn.

Education

Master of Commerce (M.Com) — XYZ University, Mumbai 2023 – *Pursuing*

Bachelor of Commerce (B.Com) — XYZ University, Mumbai 2020 – 2023

Certifications

- Google Data Analytics Professional Certificate — Coursera / Google
- Microsoft Power BI Data Analyst Associate (PL-300) — Microsoft
- SQL (Advanced) Skills Certificate — HackerRank
- Python for Data Science & AI — IBM / Coursera
- Python (Basic) Skills Certificate — HackerRank
- Data Analysis with Microsoft Power BI — Microsoft Learn
- Excel Skills for Data Analytics & Visualization — Coursera

Achievements

- Reduced data processing time by 40% through optimisation of ETL workflows and automation.
- Achieved 30% faster reporting through Power BI dashboard automation used by senior stakeholders.
- Maintained 99% data accuracy across large-scale datasets through rigorous cleaning and validation processes.
- Optimised SQL queries for large-scale databases through query refactoring and performance tuning.
