

AYUSHI MUDGAL

Data Analyst

Delhi, India | +91-8076660659 | tanmaymudgal011@gmail.com | LinkedIn | GitHub | Portfolio

Profile Summary

Results-driven Data Analyst with hands-on experience in SQL, Python, Advanced Excel, and Power BI, specializing in transforming large datasets into actionable business insights that drive strategic decision-making. Proven in building KPI dashboards and conducting in-depth analysis of customer behavior, churn, and business performance to support acquisition, engagement, and retention strategies. Strong foundation in statistical methods, BI tools, and end-to-end reporting workflows, with the ability to communicate findings effectively to cross-functional stakeholders.

Technical Skills

Programming Languages: Python (NumPy, Pandas, Matplotlib, Seaborn)

Version Control: Git, GitHub

Databases: SQL, MySQL, PostgreSQL, Google BigQuery (Basic), Joins, Aggregations, CTEs, Window Functions, CASE Statements, Subqueries

Business Intelligence & Visualization: Power BI (Data Modeling, DAX, Power Query), Tableau

Analytics & Business Reporting: Data Cleaning, EDA, Data Transformation, Trend Analysis, Root Cause Analysis, KPI & MI Reporting, Reporting Automation, Performance Metrics, Decision Support, Customer Analytics, Customer Segmentation, Marketing Analytics, A/B Testing

Statistics & ML Fundamentals: Descriptive Statistics, Probability, Hypothesis Testing, Correlation, Regression, Classification, Clustering, Sampling, Distribution & Outlier Analysis, Data Pre-processing, Feature Engineering, Model Evaluation, Cross-Validation, Scikit-learn Basics

Core Competencies: Data Cleaning, Statistical Modeling, Business Intelligence, ETL, Complex Query Optimization, Business Reporting, KPI Tracking

Continuous Learning: Apache Hive (HiveQL Fundamentals), AZURE, PySpark, Customer Lifetime Value (CLV), Marketing Campaign Analytics, Marketing ROI Analytics

Experience

MetaMinds Technologies

May 2026 – Present

Data Analyst Intern

- Cleaned, transformed, and validated raw data using Power Query, improving the accuracy and consistency of downstream reporting and supporting reliable, data-driven decision-making.
- Integrated and modeled data from 10 related datasets by building relationships in Power BI, enabling large dataset analysis and a unified view for the CourtNetra dashboard used in stakeholder decision-making.
- Developed interactive Power BI dashboards with KPI cards, slicers, drill-through pages, and DAX measures, automating recurring reporting and improving the speed and consistency of MI reporting.
- Performed trend analysis and root cause analysis on legal case datasets to surface filing trends, department-wise performance, and case priority/status patterns, translating findings into actionable business insights for stakeholders.

ScoreMyCV (scoremycv.in) | Remote

Nov 2023 – April 2026

Data Analyst Intern

- Collected and cleaned structured resume datasets to evaluate keyword frequency and ATS scoring patterns across 10+ job roles using Excel and SQL.
- Built Excel dashboards to track daily user activity, score distributions, and rewrite conversion metrics; used SQL queries to generate weekly performance summaries.

Projects

Bank Customer Churn Analysis | SQL, Excel, Power BI

<https://ayushi-mudgal.github.io/Portfolio/>

- Analyzed 9,000+ sales transactions to evaluate sales, revenue, profit, product performance, and customer purchasing trends.
- Developed an interactive Power BI dashboard with 10+ KPIs and drill-downs for performance tracking and in-depth analysis.
- Identified top-performing products and categories to uncover key revenue drivers and business growth opportunities.

E-Commerce Sales Dashboard | Excel, SQL, Power BI, DAX

<https://ayushi-mudgal.github.io/Portfolio/>

- Analyzed 9,000+ sales transactions using SQL to evaluate revenue, profit margins, product performance, and customer purchasing trends.
- Developed an interactive Power BI dashboard with 10+ KPIs and drill-down capabilities using DAX, providing real-time visibility into sales performance and supporting data-driven decision-making.
- Identified top-performing products and categories through trend analysis across regions and segments, uncovering key revenue drivers and actionable business growth opportunities.

HR Analytics Dashboard | Excel

<https://ayushi-mudgal.github.io/Portfolio/>

- Analyzed 1,500 employee records using Pivot Tables, Pivot Charts, and KPI cards to evaluate workforce composition and attrition trends.
- Examined attrition patterns across departments, job roles, age groups, and demographic segments to identify key churn drivers and workforce risk areas.
- Built dynamic HR reporting dashboards with automated visualizations, improving management visibility into employee metrics and enabling faster, data-driven workforce decisions.

Education

University of Delhi — Delhi, India

Graduated: 2022

B.Sc. (Hons.) Mathematics

Awards & Achievements

- Reduced data processing time through optimization of ETL workflows.
- Optimized SQL queries for large-scale databases through query refactoring and performance tuning.

Certifications

- SQL Certificate — HackerRank
- SQL and Relational Databases 101 — Currently Pursuing
- Microsoft Certified: Azure Fundamentals — Currently Pursuing
